## **DETAILED ACTION**

### **Reason For Allowance**

1. Claims 1-3, 5, 6 and 15-19 are allowed.
2. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 15, which include (claim 1) the electrode-coated dispersion section is sandwiched between quasi-phase-matched nonlinear gratings, the nonlinear gratings have both the grating vectors parallel to the wave vector of the mixing waves, and the amplitude modulation is dynamically adjusted to the desirable modulation regime with a direct-current voltage offset on the electrodes; (claim 15) the electrode-coated dispersion section is sandwiched between quasi-phase-matched nonlinear gratings, one of the nonlinear gratings has the grating vector parallel to the wave vector of the mixing waves, the other the nonlinear grating has the grating vector forming an angle with respect to the wave vector of the mixing waves, and the amplitude modulation is dynamically adjusted to the desirable modulation regime by laterally translating the nonlinear crystal with respect to stationary mixing waves.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
